

## Environmental Policy

Bennett Landscapes & Maintenance Ltd provides a site and grounds maintenance service to the commercial sector including clearance, restoration, landscaping and dealing with client's waste streams. The Company is committed to working in partnership with customers, suppliers and other interested parties to offer the most environmentally effective and appropriate solutions.

Bennett Landscapes & Maintenance Ltd recognises that its business activities have direct or indirect impacts on the environment and as such it is our policy to undertake our business activities in a manner which is sensitive to and protects the environment. We are committed to conserving natural resources, reducing wastes and preventing the pollution of land, water and air.

Bennett Landscapes & Maintenance Ltd also regards the promotion of an environmental strategy as a key element in operating a successful business, and that by doing so we can help to reduce environmental impacts from our operations as well as to create opportunities for providing positive benefits to the environment.

Bennett Landscapes & Maintenance Ltd appreciates that through its activities, it has a key role to work mutually with internal and external stakeholders to deliver continual improvements in our environmental performance. In support of this commitment, Bennett Landscapes & Maintenance Ltd will establish and maintain a series of objectives and targets, which will be reviewed on a periodic basis. We are also committed to helping our clients meet their own environmental objectives, and we will work closely with all those under our managerial control, such as employees, contractors and suppliers, to help us reduce our own adverse impacts. In addition to these goals, it is the policy of Bennett Landscapes & Maintenance Ltd to maintain compliance with relevant environmental legislation and all other associated requirements, which remains effective and relevant.

This policy is available to all interested parties on request.
